

## Remington F5-5800 Foil Shaver Review

The Remington F5-5800 Foil Shaver gives you the best of both worlds. It gives you a close, clean shave that a traditional blade provides, without the risk of nicking your neck a few times.

How's that possible you ask?

You can thank the flex and pivot technology that's incorporated into its design. This allows this shaver to adjust to the contours of your face, giving you a really close shave. According to its manufacturers, this device takes off 97 percent of your facial hairs when you shave.

It also has rather neat interceptor technology incorporated into its design, allowing you to achieve a closer shave with fewer passes.

### Easy-to-wash design

Another really nice feature of the Remington F5-5800 Foil Shaver that really sticks out is just how easy it is to clean. It all starts with the blades being designed not to trap any hairs, that way you don't have to spend any time picking hairs out of them. Then there's the fact this shaver is waterproof, so you can simply place it in the sink under running water when it's cleaning time.

But you wish cleaning your electric clippers was this easy don't you?

### More than a clean shave

The Remington F5-5800 Foil Shaver provides a lot more than a clean shave. It comes with a pop on detail trimmer for taking care of your beard, moustache, and nose hairs.

### Wall or battery powered

Remington F5-5800 Foil Shaver can be used with a cord or cordless. It's powered by lithium ion batteries, this really comes in handy when you don't have access to an electrical outlet. This shaver runs up to 60 minutes uninterrupted when the batteries are fully charged.

If the batteries are low, all you need to do is find an electrical outlet, and the Remington F5-5800 Foil Shaver runs fine. If you're wondering, it takes two hours to take the batteries from low to full charge.

Another nice feature of this shaver is the LED gauge that lets you know how much charge is left at all times.

### Designed for International usage

A feature of the Remington F5-5800 Foil Shaver that really sticks out is the fact it can be used anywhere in the world, regardless of if that particular country uses 120 or 240 volts. That's a big bonus for anyone who does a lot of international travelling. It eliminates the need to add a power converted to your luggage whenever you travel.

Here's another cool feature for frequent travelers. This shaver only weighs one pound.

It's rather obvious, the Remington F5-5800 Foil Shaver is one of the better options out there is you're in the market for a reliable, electric shaver. It has all the key features you need to keep your facial hairs nicely groomed, regardless of if you prefer a clean shave or a moustache and sideburns.

To get the most out of Remington F5-5800 Foil Shaver every time you shave, here are some tips you can follow.

1. Make sure your skin is clean and dry before you start shaving
2. Apply only moderate pressure when shaving. There's no need to push down hard when shaving. That only leads to an inefficient shave and a lot more strokes.
3. Move the shaver across your face slowly when you shave. Never go in circles, always use back and forth motions only. Remember the pivot and flex feature we talked about earlier? The Remington F5-5800 Foil Shaver has technology incorporated into its design that allows it to bend to the contours of your face. All you need to do is move it back and forth in any direction you choose, and the shaver takes care of the rest on its own. Like most shavers, the F5 sounds a different when it's running over smooth skin as opposed to cutting hairs, so you be able to use that to your advantage as you become more familiar with it for even more efficient shaves.
4. Always remember to clean this device properly after each shave. That's what keeps the blades sharp on this or any other electric shaver.
5. Feel free to use this shaver twice a day. Some men have facial hairs that grows faster than others, so if you're one of these men, you should know the Remington F5-5800 Foil Shaver can be used twice a day without irritating your skin.

#### Pros:

- Easy to clean
- Work with 120 or 240 volts
- Can be used cordlessly
- Waterproof
- Weighs only a pound

#### Cons:

- Limited options for those who would rather trim facial hair
- Not designed for a wet shave
